

About us

Wrike's mission is to help customers do the best work of their life by transforming the way they plan, manage, and complete work. As the only enterprise-ready, cloud-based collaborative work management platform that is fully configurable for any department, team, or workflow, Wrike drives standardization and ensures cross-functional collaboration in a secure environment. Every day, more than two million users across 20,000+ companies use Wrike to drive topline processes across their organizations.

Wrike was founded in 2006 by Andrew Filev. As a young entrepreneur, Filev quickly grasped the challenges organizations faced in scaling a successful operation. Frustrated with the limitations of working through email and spreadsheets, he began to build his own collaborative tools that immediately improved his team's communication and business productivity. Filev started Wrike to focus solely on building this new class of business

software. Over the last 10+ years, he has built Wrike from a small startup to a leading provider of project management, work management, and collaboration solutions, initially bootstrapping the company before guiding it to more than \$25M in funding.

Today, Filev serves as Chief Executive Officer and remains the primary visionary behind the product and company. In product development, he values innovation velocity with a customer-first approach. As a CEO, he strives to create a positive culture and great workplace for the entire Wrike team.

In 2018, Wrike signed a definitive agreement to receive a majority investment by Vista Equity Partners ("Vista"), a leading investment firm focused on software, data and technology-enabled businesses.
